

Override Key  
Pod  
Door

Experience a safer  
and more open world

## OVERRIDE KEY

When the key cabinet was installed a set of override keys will have been given to a representative at the dealership and signed for. It is important you have access to these keys by the relevant people as without these keys you will not be able to gain access to your keys stored in the key cabinet if there is a failure or the battery has run out after a long power cut.

## POD

You may be asked by our support team to obtain access to the pod. You should insert the override key and rotate, taking care as the pod may fall forward once released.

## DOOR

You may be asked by our support team to unlock the door manually using the override key. Insert and rotate and pull the door open.
