Key control explained

Not having the right key at the right time is not only frustrating but is a security risk that could potentially stop your business in its tracks.

Putting your keys in a key box or locked in a desk drawer may seem a simple solution but it soon becomes complicated. The challenge with this traditional method of key control is that it is inefficient and unreliable and makes tracing keys an almost impossible task.

Keys grant access to your organization's most valuable assets and should be protected accordingly.

Electronic key control simplifies the process by checking access permissions and creating an audit trail every time a key is removed or returned. But there's much more that an electronic key management system can do.

The benefits of electronic key management

Create accountability

with your staff knowing they are responsible for the keys they use

Increase productivity

by reducing the time spent locating keys

Lower costs

replacing keys and locks due to lost or stolen keys

Reduce risk

by tracking and auditing keys in real-time

Ensure only authorized access

to specific keys by assigned staff

Improve safety and security

by ensuring sensitive keys don't get in the wrong hands

Traka Touch Pro

Traka's intelligent key management systems secure, manage and audit the use of every key in your business.

Traka Touch Pro is our most secure and sustainable cabinet to date and is available in four different sizes, managing anywhere from 5 to 720 keys.

Touch Pro L (up to 720* keys)

Touch Pro M (up to 40 keys)

Touch Pro S (up to 480* keys)

Touch Pro V (5 keys)

*With extension cabinets

A fully integrated solution

TrakaWEB is a browser-based administration software for centrally managing your Traka systems from any authorized device, anywhere in the world.

Simplify your administration by integrating Traka with your existing third-party system to use the data you already have and make your keys work for you like never before.

Features of a fully integrated solution:

Set curfews

to ensure keys are returned when required

Send email notifications

for issues such as curfews or faulty items

Get real-time reporting

with a full audit-trail

Remotely release keys

to authorized users

Ensure keys are returned

before users leave site

Log faults

for vehicles and equipment

Why choose Traka?

Traka, part of ASSA ABLOY Global Solutions, is the global leader in intelligent management solutions for keys and equipment.

We continuously invest in the development of our technology to

provide leading, innovative, secure and effective real-world solutions to the challenges that organizations face in managing keys and equipment. Our solutions are tailored to customer needs and requirements, providing the most value and impact on their business.

Government, prison & police facilities

Retail & distribution companies

Hospitals & healthcare services

Hospitality & leisure

Data centers

Property management

Utility, mining & industrial facilities

The ASSA ABLOY Group is the
global leader in access solutions.
Every day we help people feel
safe, secure and experience a
more open world.
