

TrakaWEB

Your ultimate asset management solution

traka
ASSA ABLOY

Experience a safer
and more open world

Streamline, secure, and gain unprecedented insights into your assets

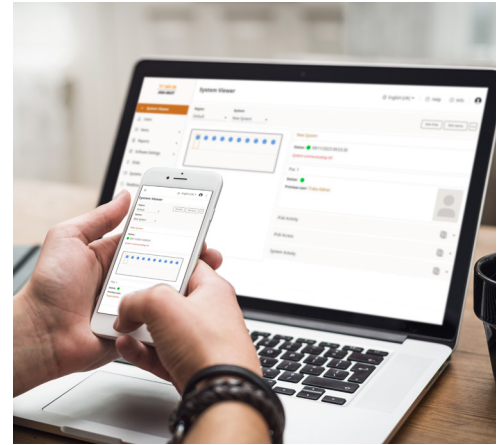

TrakaWEB is the future of asset management—a revolutionary browser-based administration suite tailored to meet the evolving needs of businesses navigating the complexities of technology and efficiency.

In today's world, where secure and intelligent asset management is more critical than ever, **TrakaWEB** emerges as the ultimate solution, empowering organizations to streamline, secure, and gain unprecedented insights into their valuable assets.

TrakaWEB is an innovative hub for managing Traka Touch key cabinets and locker systems. Beyond administration, this comprehensive asset management software improves operational efficiency and security.

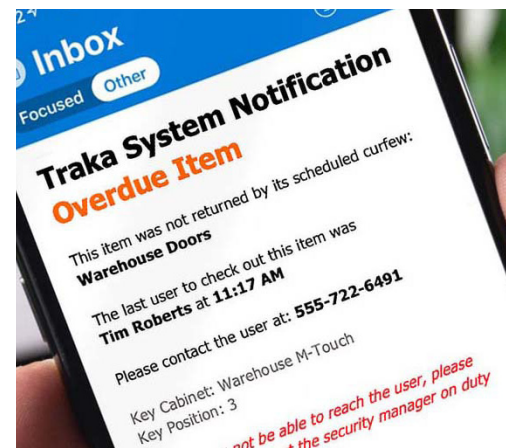

Remote administration

Accessible through any authorized device connected to your network. Our browser-based approach allows you to manage your assets efficiently and securely from anywhere.

Automated notifications

Stay informed with email notifications for important system activities, ensuring quick responses to exceptional events.

Multilingual support

With support for 20+ languages, TrakaWEB automatically adapts to the language preference of each user during login. This makes TrakaWEB ideal for organizations with international reach.

Complete audit trail

Retain a comprehensive history of all key cabinet, locker, and user transactions, providing full transparency and accountability.

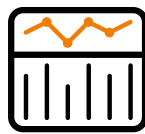

Why choose TrakaWEB?

Enhanced efficiency

TrakaWEB cultivates a culture of accountability and responsibility by providing a comprehensive view of asset utilization, encouraging efficient practices within organizations.

Valuable insights

TrakaWEB provides valuable insights into who accessed which assets, when they were taken, if they were returned on time and how often they are taken. By identifying usage trends and irregularities, it enables informed decision-making regarding asset access and management.

Unmatched security

Access is restricted to authorized users with all communication between them being secured and encrypted. The solution offers flexibility in determining user access, supported credentials, and password strength. This means full control over valuable assets, providing peace of mind that their digital security matches their physical world.

Scalable for enterprise-level use

A highly scalable solution that accommodates thousands of systems, ensuring that it caters to businesses of all sizes. The solution grows as your business requirements change allowing you to add additional lockers and cabinets to your portfolio as your business needs evolve.

TrakaWEB by leading organizations worldwide

We take pride in providing innovative solutions that address the unique challenges faced by organizations across various industries.

TrakaWEB has been instrumental in transforming the operations of numerous organizations, ensuring enhanced security, accountability, and operational efficiency.

Seamless integration for improved efficiency

Simplify your administration by integrating Traka with your third-party system to use the data you already have to better manage access and security while driving improvement.

- ✓ **Manage access efficiently**
- ✓ **Enforce compliance**
- ✓ **Match access to shift patterns**
- ✓ **Prevent items from being taken off-site**
