

Key and equipment management solutions for casinos and gaming

Traka helps create highly secure and automated processes for managing access to the physical keys, shared devices, and sensitive assets critical to gaming operations.

There are few environments where security is more critical than a casino. With the extensive infrastructure required to monitor and protect activities on the floor, it can often be backend operations and manual processes that pose the greatest risk to profitability.

Traka solutions are trusted in many of the world's most secure environments for managing access to physical keys, sensitive equipment, and secure areas. Our electronic key cabinets provide a secure, automated process for managing and auditing access to every key in your facility, with powerful administrative tools to enforce strict security and regulatory requirements.

Expand your security ecosystem

An integrated Traka solution can effectively extend your casino's security infrastructure to your count rooms, drop boxes, slots, gaming tables, and more, with powerful workflows to make your critical daily processes more secure and efficient.

With Traka, you can:

- Automate and enforce security protocols for accessing keys and equipment
- Maintain compliance with real-time reporting and visibility over key activity
- Limit exposure by ensuring keys are returned to the system as soon as a job is completed
- Require multiple authorizations for key removal or return, while capturing a full audit trail
- And much more!

**Strict access control
for keys & equipment**

**Automate
manual processes**

**Monitor and document
every transaction**

**Custom reporting
for easy compliance**

Traka Touch Pro

Traka key cabinets secure your inventory, with each key set physically locked in place, electronically identified, and only released to the right people at the right times.

Manage 5-180 keys per cabinet, with flexible configuration options to meet strict management requirements.

Robust steel construction supports increased security, and heavy-use processes

Ultra-responsive, intuitive touchscreen interface delivers faster interactions, process completion, and reporting

Flexible, multi-factor authentication options integrate with existing access control policies and tokens

Configurable door options with solid steel or clear doors to align with security levels and access needs

Scalable key capacity can grow with business needs and adapt to new procedures and policies

Traka iFob

Keys are secured to our nickel-plated brass iFob, uniquely identifying each key to the system and delivering years of reliable, maintenance-free performance

Industry-leading features for the demanding needs of gaming operations

Flexible & secure authentication

Require multiple authorizations

Per-item access control

Fixed key positions for fast transactions

3 dry-contact alarm relays

Emergency battery backup

Simplified compliance

Traka Touch Pro helps meet gaming requirements for key access, with full activity audits and reporting.

- Document reasons for unscheduled key access directly at the system
- Record all authorizations required for key removal
- Create custom reports to audit activity for specific items, users or systems
- Automatically run and deliver reports for daily monitoring of item status, or to meet scheduled reporting mandates

Equipment lockers

Traka lockers are available in a range of sizes and configurations to meet the needs of your assets and management processes.

Traka smart locker solutions provide centralized control and visibility over access to your casino's radios, tablets, laptops, weapons, and other assets critical to daily operations.

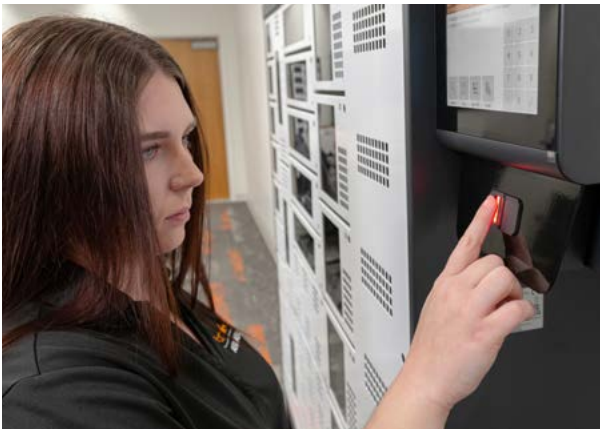

Create an automated process for authorized staff to checkout and return assets, while enforcing your management policies with no manual oversight required. Monitor and audit every transaction for total accountability, and ensure equipment is used efficiently, responsibly, and safely.

Per-asset identification

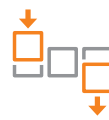

Our RFID tagging option enables you to uniquely monitor and track access to every item.

Integrated device charging

Each locker compartment can be equipped with a charging cradle or cable to ensure shared devices are always ready for use.

Smart locker features for efficient and effective management

FIFO item allocation

Using first-in first-out distribution, your equipment inventory is evenly used and devices are always charged upon checkout.

Access Schedules

Specify the exact days and times items are available to certain users, limiting exposure and preventing unnecessary item access.

Curfews

Limit the length of time items can be out of the system, and be immediately notified as soon as an item is overdue.

Fault Logging

Enable users to report any equipment faults upon returning an item, and automatically restrict further access until repaired or replaced.

Manage access your way

Traka key cabinets and lockers can be installed at convenient locations throughout your casino, offering fast and secure item access at the point of use to minimize exposure for your most sensitive assets.

All systems are centrally managed and monitored via our browser-based administration software, TrakaWEB. Dozens of customizable features help enforce your existing security protocols, with deep reporting functions for total visibility and easy compliance.

Integrate with existing systems

Integrating TrakaWEB with your existing security infrastructure offers many enhancements to efficiency, visibility and overall security. Synchronize data from a central database for effortless administration, while monitoring all Traka item access from your central security platform.

- Automatically synchronize Traka users and credentials from security system
- Monitor Traka alarms inside your security system and trigger actions and workflows

Traka brings the intelligence of electronic access control to every key, sensitive asset, and critical area of your gaming operation.
